

## CONFUSED ABOUT YOUR FUTURE? HAVE YOU CONSIDERED A CAREER IN MANUFACTURING?

Careers in manufacturing can take you anywhere your imagination wants to go. It's a front row seat to using some of the world's most advanced technology. It's the kind of career where you'll use problem solving skills, creativity and critical thinking.

The GCAMP Open House hosted by BIG KAISER is an event directed towards area parents and students that will explain what manufacturing means in today's advanced economy. The agenda includes presentations about the industry, manufacturing technology demonstrations and opportunities to talk to professionals in manufacturing.

### KEY TAKE-AWAY FROM THE EVENT

**Speaker: Greg Jones, Vice President, Smartforce Development with AMT – The Association for Manufacturing Technology**

Greg will frame the size and scope of U.S. manufacturing, provide insight on the industry's need to develop the next generation of career-minded individuals and will outline the scope and opportunity outlook for the kind of jobs that are available in manufacturing today, and those jobs that will come from new innovations in manufacturing technology in the future. We'll also get a preview of the next Student Summit at IMTS coming in September 2016.

AMT - The Association for Manufacturing Technology produces the largest manufacturing trade show in North America, the International Manufacturing Technology Show (IMTS) in Chicago at McCormick Place September 12-17, 2016

### PREVIEW THE NEXT IMTS STUDENT SUMMIT

With more than 50 hands-on exhibits planned for September, students will be able to try out new technologies. The Student Summit at IMTS provides a fun and interactive environment to introduce educators, students and parents to exciting innovations in manufacturing technology and dynamic careers in the industry. You'll hear from Greg how you can be a part of the eye opening event!

### SEE THE 2016 IMTS RALLY FIGHTER AT BIG KAISER

The IMTS Rally Fighter embodies the spirit of American manufacturing and innovation. The Rally Fighter itself is the world's first open-source production vehicle, designed and developed by a collaboration between Local Motors and a global community made up of thousands of designers, fabricators, engineers and auto enthusiasts.
